

# Jibu: Kwa nini China inahamisha makampuni yenye kazi nyingi kwenda Vietnam na India, na si kuhamisha mnyororo wa viwanda wa kiwango cha chini kwenda Pakistan?

Zhihu • 2026-02-22

---

Uwekezaji wa China nchini Pakistan kwa sasa unalenga hasa miundombinu ya usafiri na nishati; uwekezaji wa viwanda ni mdogo, unalenga hasa tasnia ya nguo ambayo Pakistan ina msingi fulani.

Makampuni ya viwanda ya China yanawekeza Vietnam kwa sababu za gharama: viwanda vya China vimeanza kuhamia Vietnam, Indonesia, Kambodia na nchi nyingine za Asia ya Kusini-Mashariki karibu na China. Katika muktadha wa vita vya biashara, uhamishaji huu umeharakishwa. Makampuni ya China yanawekeza India kwa sababu sera za viwanda za India pamoja na soko kubwa la India hulazimisha makampuni ya kigeni kujenga viwanda vya ndani. Wakati huo huo, uhamishaji wa makampuni ya kimataifa wa sehemu za kati na za chini za mnyororo wa viwanda kwenda India (kama Apple) unaharakisha uhamishaji huu.

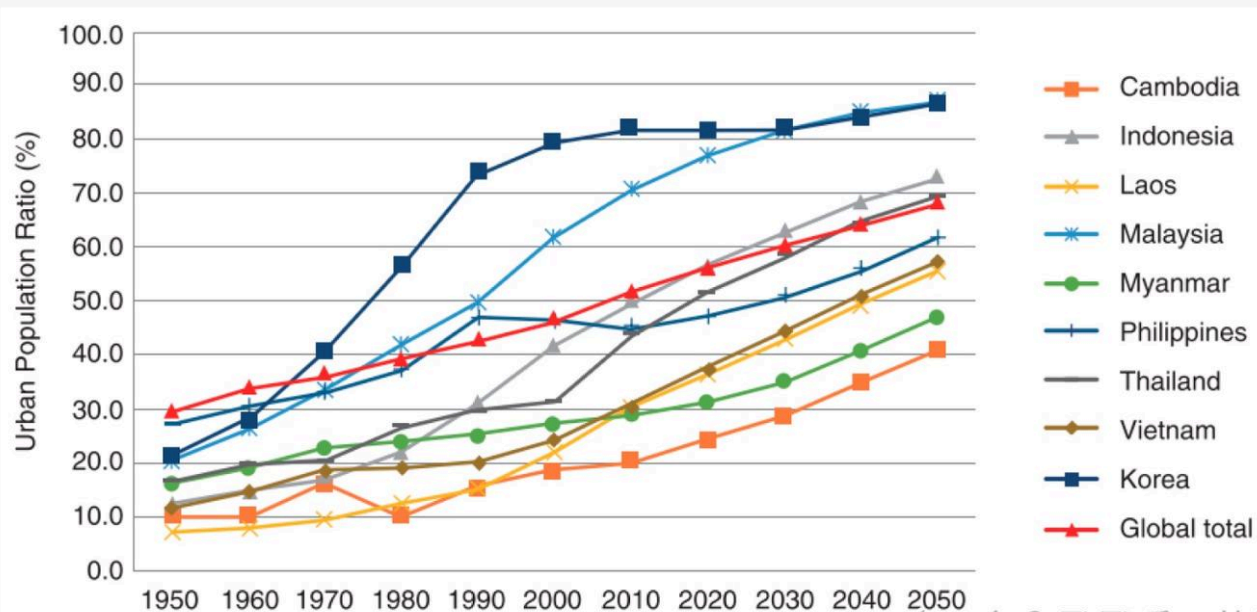

Pakistan iko mbali kijiografia na kituo cha viwanda (Asia ya Mashariki + Asia ya Kusini-Mashariki), angalau mbali zaidi kuliko India. Kiwango cha miundombinu cha India, ubora wa nguvu kazi (kiwango cha elimu), idadi ya nguvu kazi ya ziada, kiwango cha mnyororo wa ugavi wa ndani, ukubwa wa soko — vyote ni bora zaidi kuliko Pakistan; kwa hiyo makampuni ya kimataifa hayawezekani kuhamia Pakistan kwa wingi. Kama vile baada ya miaka ya 1990 mtaji wa kimataifa ulivyohamia China kwa wingi, nchi yenye hali bora na wakazi wengi, badala ya India.

Bila shaka, kwa sababu ya migogoro ya kijiografia na kisiasa kati ya China na India, wakati nguvu kazi ya ziada ya Asia ya Kusini-Mashariki itakapoisha na kuhitajika uhamishaji mkubwa wa viwanda vya kati na vya chini, makampuni ya China (chini ya mwongozo wa serikali) yanaweza kuchagua mkakati wa "India + 1", kufanya uwekezaji fulani wa viwanda katika nchi nyingine kama nakala ya mnyororo wa ugavi. Kwa kuzingatia wakazi, umbali, uhusiano wa kisiasa na mambo mengine, Pakistan ndio chaguo bora.

Kufikia 2040, uwiano wa miji wa Vietnam utazidi 50% (kiwango cha China 2011), Indonesia utafikia 65% (kiwango cha China 2022), Philippines 55% (kiwango cha 2015).

Mwelekeo halisi kwenye picha hapa chini<sup>[1]</sup>.

**Figure 3.** Urbanization Trends and Prospects of ASEAN Countries (1950–2050).

知乎 @最最遥远的路

Kwa hiyo, katika miaka ya 2040, viwanda vya kati na vya chini vya Asia ya Kusini-Mashariki vitaanza uhamishaji mkubwa nje. India na Bangladesh zitakuwa lengo sahihi zaidi. Kwa kuwa uwiano wa makampuni ya China katika makampuni ya Asia ya Kusini-Mashariki ni mkubwa, ikiwa Pakistan itakamilisha miundombinu ya usafiri na nishati kabla ya 2040 na kuinua ubora wa nguvu kazi, kuvutia makampuni ya China kunawezekana kabisa.

Kwa hiyo, jambo kuu: hali ya miundombinu na viwanda vya msingi vya Pakistan ikoje? Je itaweza kupokea manufaa ya wimbi lijalo la uhamishaji wa viwanda? Hebu tuchambue kwa undani.

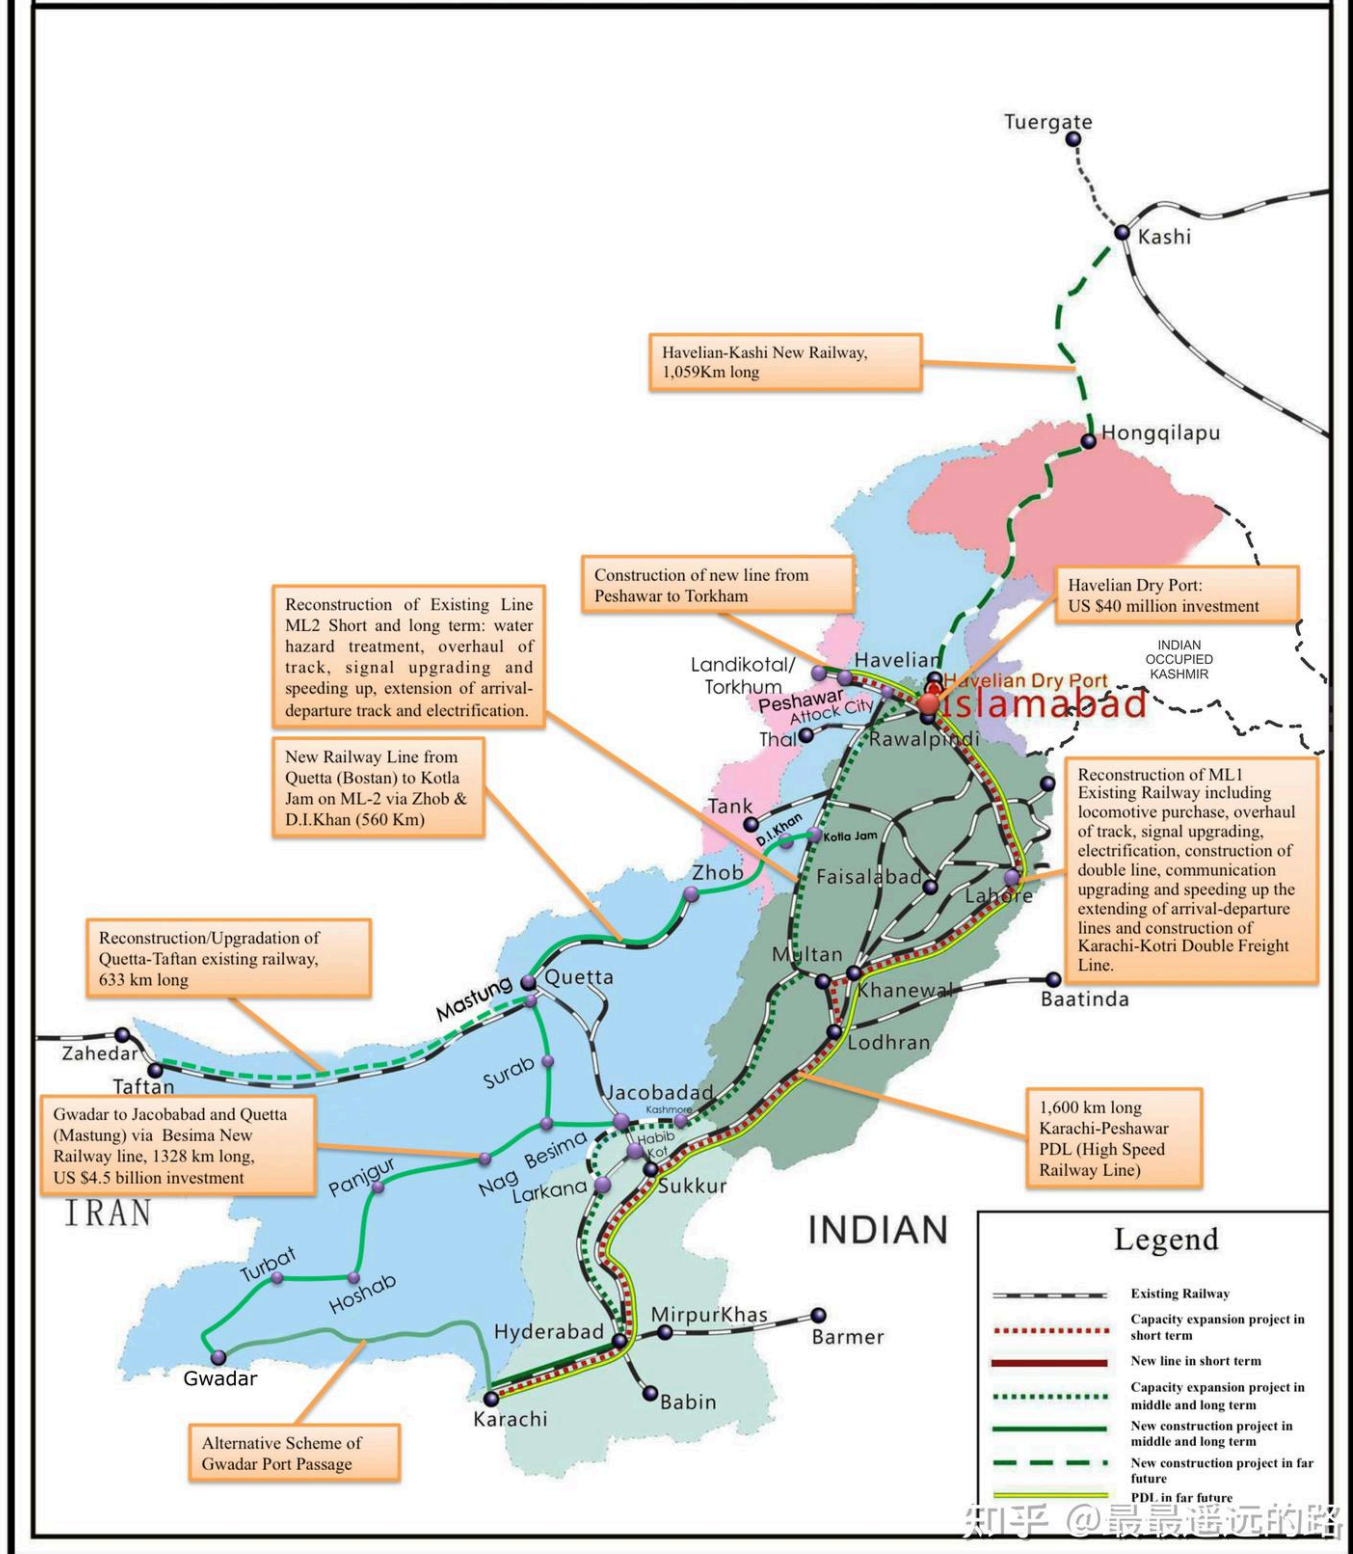

## Miundombinu ya usafiri

### Reli

Reli za Pakistan ni mabaki ya Waingereza, zimechakaa na hazitumiki. Sasa Pakistan inajaribu kuinua reli zote na kujenga nyimbo mpya, kuinua kiwango cha miundombinu.

Katika mfumo wa mradi wa Ukanda wa Kiuchumi wa China-Pakistan (CPEC), Pakistan imepanga miradi mingi ya reli, kama picha hapa chini<sup>[2]</sup>.

# Railways Network of CPEC

Njia kuu za reli za Pakistan ni tatu zinazopita kaskazini-kusini: ML-1, ML-2, ML-3. Kwa kuwa wakazi wamejikita katika majimbo ya Sindh na Punjab (tazama ramani ya

- BAZIR: 304,2

\* Azad-Kashmir and Gilgit-Baltistan data is temporary because the corresponding data set is not complete. They are incomplete or population data is partially included only as 2017 data - 2023 census data is not yet included, but will be incorporated when presented.

Kulingana na Waziri wa Reli wa Pakistan Hanif Abbasi, Benki ya Maendeleo ya Asia (ADB) imeidhinisha mkopo wa dola bilioni 2 kwa Pakistan kwa ajili ya kujenga reli

ya Karachi-Rohri. Reli hii ya kilomita 480 ni sehemu muhimu ya ML-1; baada ya kukamilika, muda wa safari kati ya miji hiyo utapungua kwa angalau saa 5.

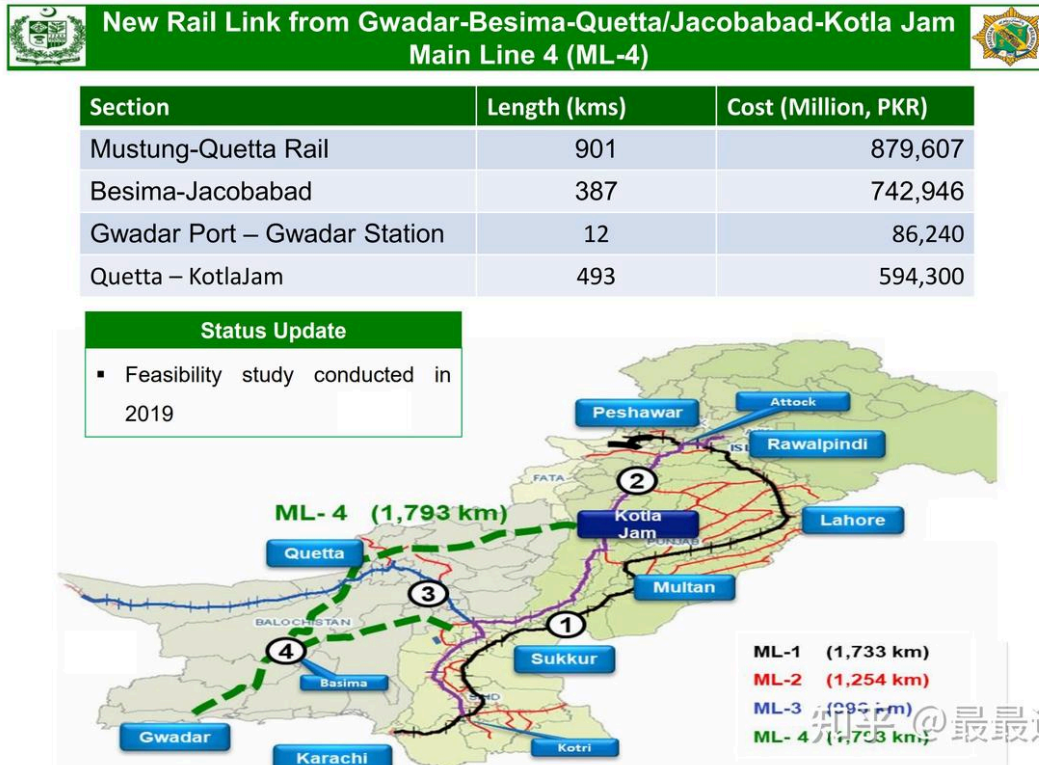

Uwekezaji wa ADB unatoa msaada mkubwa kwa mradi na maendeleo ya CPEC 2.0<sup>[7]</sup>.

Mradi unatarajiwa kukamilika kabla ya 2030; kwa kuwa utekelezaji ni wa makampuni ya China, mradi fedha zinatoshwa, muda hautakuwa tatizo. Baada ya kukamilika, muda wa safari kutoka Karachi hadi Lahore utapungua kutoka saa 22 hadi karibu 8.

Baada ya ML-1, Pakistan itazingatia ML-2 na ML-3; zote mbili bado katika utafiti na fedha<sup>[8][9]</sup>.

Zaidi ya hayo, Pakistan inaendeleza mradi wa reli unaounganisha bandari ya Gwadar. Kwa kuwa Gwadar ni mradi mkuu wa uwekezaji wa China, fedha za mistari hii zitapatikana kwa urahisi zaidi kutoka China.

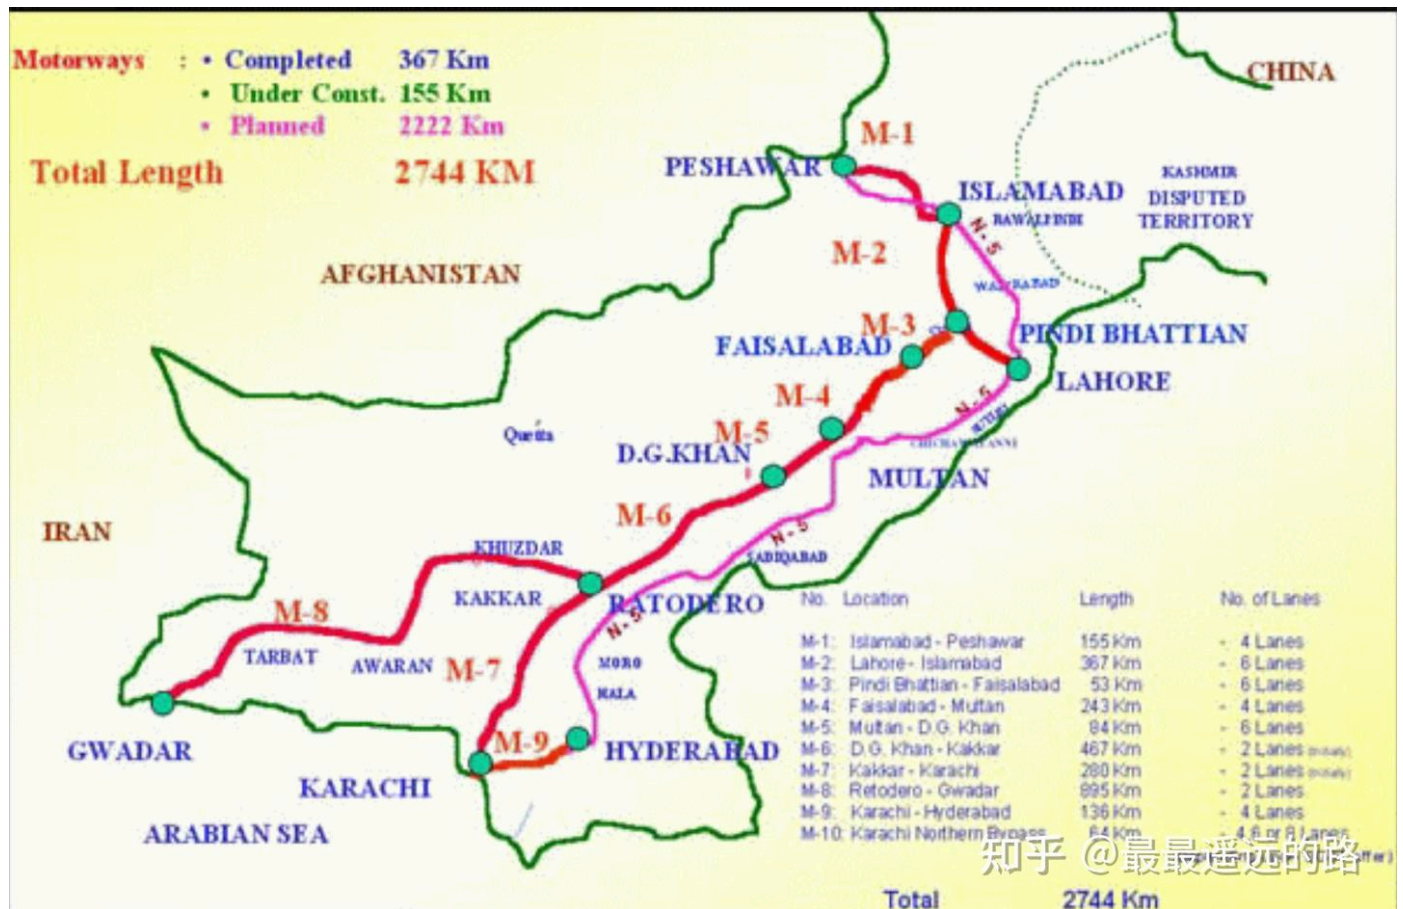

Hivi karibuni, kamati ya kudumu ya Seneti ya Pakistan ilijulishwa kwamba utafiti wa uwezekano wa reli ya Gwadar, uliofanywa na shirika la kimataifa la ushauri, umekamilika, na mipango itapitia idhini ya mwisho. Mjadala ulijumuisha njia kuu ya Gwadar-Nokundi ya kilomita 680 na njia kuu ya nne (ML-4); pia habari za reli ya Basma-Yakobabad, utafiti wake umekamilika, gharama dola bilioni 4.7<sup>[10]</sup>.

ML-4 inapitia jimbo la Balochistan, na itasaidia sana maendeleo ya jimbo hili lililo nyuma.

## Barabara za haraka

Ujenzi wa barabara za haraka unaendelea. Kama reli, zinalenga majimbo ya Sindh na Punjab. Barabara ya haraka kutoka Peshawar kupitia Islamabad, Lahore hadi Karachi (M1-M7), njia sita, kilomita 1100: sehemu 6 zimekamilika, sehemu iliyobaki (M6) inajengwa.

Chanzo: [https://pakistanpaedia.com/mega/highways\\_motorways\\_of\\_pakistan.html](https://pakistanpaedia.com/mega/highways_motorways_of_pakistan.html)

Mbali na hiyo, kuna barabara ya M8 inayounganisha Gwadar, kupitia Balochistan, kilomita 900, njia nne; zaidi ya kilomita 100 zimefunguliwa, 700 zinajengwa.

Video hapa chini imepigwa na mtumiaji wa Pakistan (sio Kiarabu... sio Kiingereza, angalia tu): inaonyesha barabara za haraka za Pakistan zinajengwa vizuri. Kwa kuwa CPEC ni mradi wa bendera wa "Ukanda na Njia", uwekezaji wa China katika miundombinu ya Pakistan ni mkubwa, umesaidia Pakistan kukamilisha mtandao wa barabara za haraka mapema. Inatarajiwa kabla ya 2040, miji yote mikubwa na ya kati ya Pakistan itaunganishwa na mtandao wa barabara za haraka.

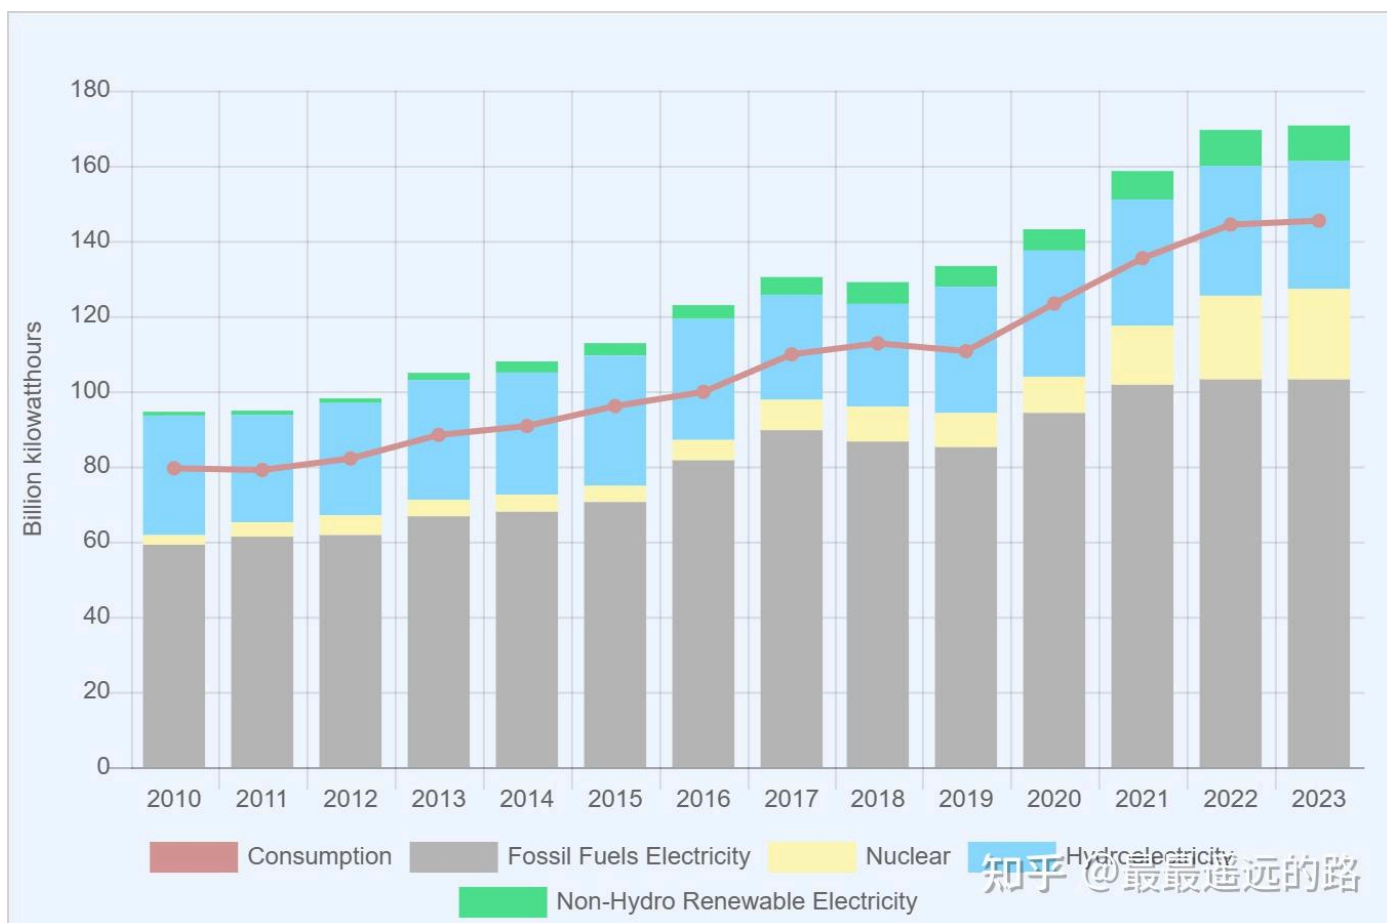

## Miundombinu ya nishati

### Umeme

Umeme ni mradi mkuu wa CPEC, kwa hiyo uzalishaji wa umeme wa Pakistan unaongezeka haraka.

Katika miaka kumi iliyopita, jumla ya uzalishaji wa umeme wa Pakistan uliongezeka karibu 80%. Kufikia 2023, karibu 60% ya umeme ulitoka viwanda vya joto, 20% maji, 14% nyuklia. Nishati mbadala ilichangia karibu 6% kufikia 2023. Kwa kulinganisha, 2010 uzalishaji wa mbadala ulikuwa chini mara 10<sup>[11]</sup>.

2024, uzalishaji wa umeme kwa kila mtu wa Pakistan karibu kWh 700 (kiwango cha China 1994). 2024, uwezo wa uzalishaji wa Pakistan karibu gigawati 46; kutoka 2025 hadi 2040, utaongezeka karibu 80% (kwa mwelekeo wa miaka 10 iliyopita, kwa makadirio ya hali mbaya ya miaka 15); kwa kuzingatia wakazi wanaongezeka 20%, uzalishaji kwa kila mtu utaongezeka 50% hadi kWh 1050 — kiwango cha China 2000.

### Usafishaji wa mafuta

Kwa sasa, uwezo wa usafishaji wa mafuta ya Pakistan mapipa 450,000 kwa siku<sup>[12]</sup>. Kwa kuwa tasnia ya petrokemikali imeendelea, uwekezaji mkubwa unawezekana; vyombo vya habari vimeripoti ushirikiano wa Pakistan na Saudi Aramco kujenga kiwanda cha mapipa 300,000 kwa siku, dola bilioni 10<sup>[13]</sup>.

### Viwanda vya msingi

Ili kupokea viwanda vya kati na vya chini vya mnyororo wa kimataifa, Pakistan lazima iongeze uwezo wa viwanda vya msingi; vinginevyo viwanda vya kigeni vitaagiza kila kitu, na manufaa kwa mkusanyiko wa mtaji wa ndani yatakuwa madogo.

### Chuma

Uzalishaji wa chuma wa Pakistan (2024) tani milioni 4.1 tu<sup>[14]</sup>.

Kuna miradi miwili mikubwa katika chuma.

Ya kwanza: Yaxing Steel, uwezo wa awali tani elfu 500 kwa mwaka, hatimaye tani milioni 2.

Asubuhi ya Machi 26, 2018, Islamabad, Pakistan: Yaxing Steel, kwa uongozi wa Mkurugenzi Mtendaji Liang Bin na Makamu Mwenyekiti Zubir, kwa msaada wa serikali ya KPK, ilisaini mkataba wa ujenzi na China First Metallurgy. Kazi zinajumuisha karakana ya kuyeyusha, uchapishaji wa kuendelea, kiwanda cha oksijeni, karakana ya rolling, kituo cha umeme n.k. Al-haj Yaxing Steel itakuwa kampuni kubwa zaidi ya chuma nchini Pakistan. Mradi wa tani elfu 500 kwa mwaka ni mradi mkubwa zaidi wa pamoja wa Hebei Xinyu Steel na Al-haj; uwezo wa jumla tani milioni 2<sup>[15]</sup>.

Ya pili: Pakistan Steel Mills ya serikali. Awali ilipangwa kuuzwa kwa makampuni ya China; lakini kwa kuwa mradi huu ulijengwa kwa msaada wa Soviet, Urusi inataka kuuchukua; Pakistan imeamua kupeleka mradi kwa Urusi<sup>[16]</sup>.

Inatarajiwa kufikia 2030, chuma cha Pakistan kitafikia tani milioni 8; kufikia 2040, tani milioni 15 — tatizo si kubwa.

## Saruji

2024, uzalishaji wa saruji wa Pakistan tani milioni 37.6 — nafasi ya 15 duniani<sup>[17]</sup><sup>[18]</sup>. Miradi ya "chuma, barabara, madaraja" na ukuaji wa mali isiyohamishika vinaongeza uzalishaji. Hakuna udhaifu mkubwa.

## Uenezi wa elimu

Tatizo kubwa la viwanda vya Pakistan ni ujinga: kiwango cha kusoma na kuandika 63%, cha chini zaidi katika Asia Kusini, chini sana kuliko India (87%).

Kikanda, ukaguzi unaweka Maldivi zaidi ya 98% ya kusoma na kuandika kwa watu wazima, Sri Lanka 93%, India 87%, Bangladesh 79%. Nepal 68%, Bhutan 65%; wastani wa Asia Kusini 78% — pointi 15 juu kuliko Pakistan<sup>[19]</sup>.

Kiwango cha elimu cha Pakistan si sawa: Punjab juu zaidi, kisha Sindh; majimbo mawili ya magharibi chini sana. Lakini Punjab ndio wenye wakazi wengi (karibu milioni 130), jimbo moja likizidi wakazi wote wa Vietnam; pamoja na Sindh (milioni 50), na kuzidiwa kwa uzazi, kufikia 2040 jumla ya majimbo hayo mawili itazidi milioni 250 — kama

majimbo makubwa 3-4 ya China. Kwa hiyo, kwa kuinua kiwango cha kusoma na kuandika katika majimbo hayo mawili, nguvu kazi ya kupokea uhamishaji itatosha.

**Literacy Rate in Pakistan  
age 10 year and older (%)**

| Province    | Male | Female | Total |
|-------------|------|--------|-------|
| Pakistan    | 73.4 | 51.9   | 62.8  |
| Punjab      | 74.2 | 58.4   | 66.3  |
| Sindh       | 72.9 | 49.7   | 61.8  |
| KP          | 72.8 | 37.4   | 55.1  |
| Balochistan | 69.4 | 36.8   | 54.5  |

知乎 @最最遥远的路

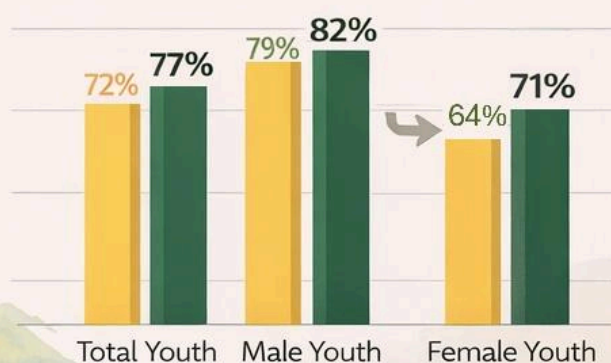

Chanzo: <https://propakistani.pk/2024/01/05/breakdown-of-literacy-rates-of-all-provinces/>

Lakini Pakistan haitumi fedha za kutosha kwa elimu; kiwango cha kusoma na kuandika kinaongezeka polepole, kimebaki karibu 60% kwa miaka mingi. Hata hivyo, kwa miaka ya hivi karibuni, kusoma na kuandika kwa vijana kunaongezeka haraka. Kama picha hapa chini: vijana 77%, ongezeko kubwa kwa wanawake wa vijijini.

# Youth Literacy in Pakistan Shows Quiet Progress

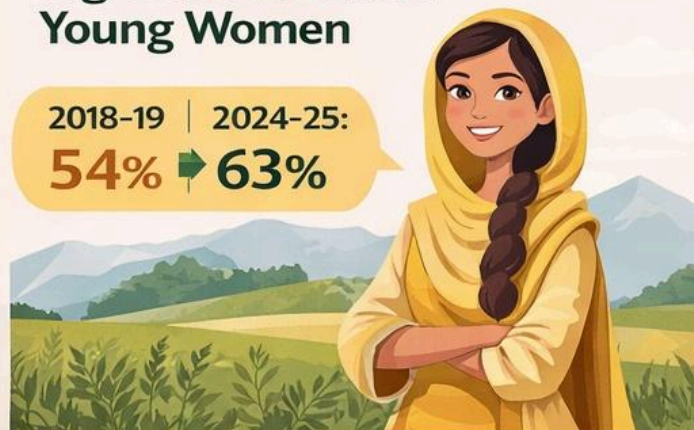

Youth Literacy Rate Reaches 77% — Rural Young Women Lead 9-Point Gain between 2018-19 to 2024-25

## Youth Literacy Rate, Ages 15-24

## Big Gains for Rural Young Women

2018-19 | 2024-25:  
**54% → 63%**

- ✓ **Rural female youth** literacy increased from 54% in 2018-19 to 63% in 2024-25, a 9-percentage-point gain.
- ✓ **Rural young women** are driving a disproportionate share of national progress in youth literacy.

## Gender Gap Narrowing

- Male youth literacy rose from 79% to 82%

- Female youth literacy grew from 64% to 71%

Data covers ages 15-24 | Surveys conducted 2018-19 vs 2024-25

Kujiunga na shule za sekondari

Ingawa njia ni ya mawimbi, kuinua kiwango cha elimu cha Pakistan hadi kiwango cha India 2010 (kujiunga sekondari 65%) hakupaswi kuwa tatizo.

## Tatizo la usalama

Tatizo lingine kubwa la Pakistan ni usalama. Sababu za matatizo ya muda mrefu ya usalama ni sawa katika nchi zote: usawa wa maendeleo ya uchumi. Kama picha hapa chini, majimbo ya magharibi yamekuwa nyuma ya mashariki. GDP kwa kila mtu ya magharibi ni nusu ya mashariki. Kwa hiyo katika majimbo hayo mawili kuna shughuli za mashirika ya KB. Ingawa uwekezaji mwingi wa CPEC unaenda huko, ni miradi mikubwa ya miundombinu na nishati, athari yake kwa maisha ya wakazi ni ndogo, na haisaidii kutatua usalama.

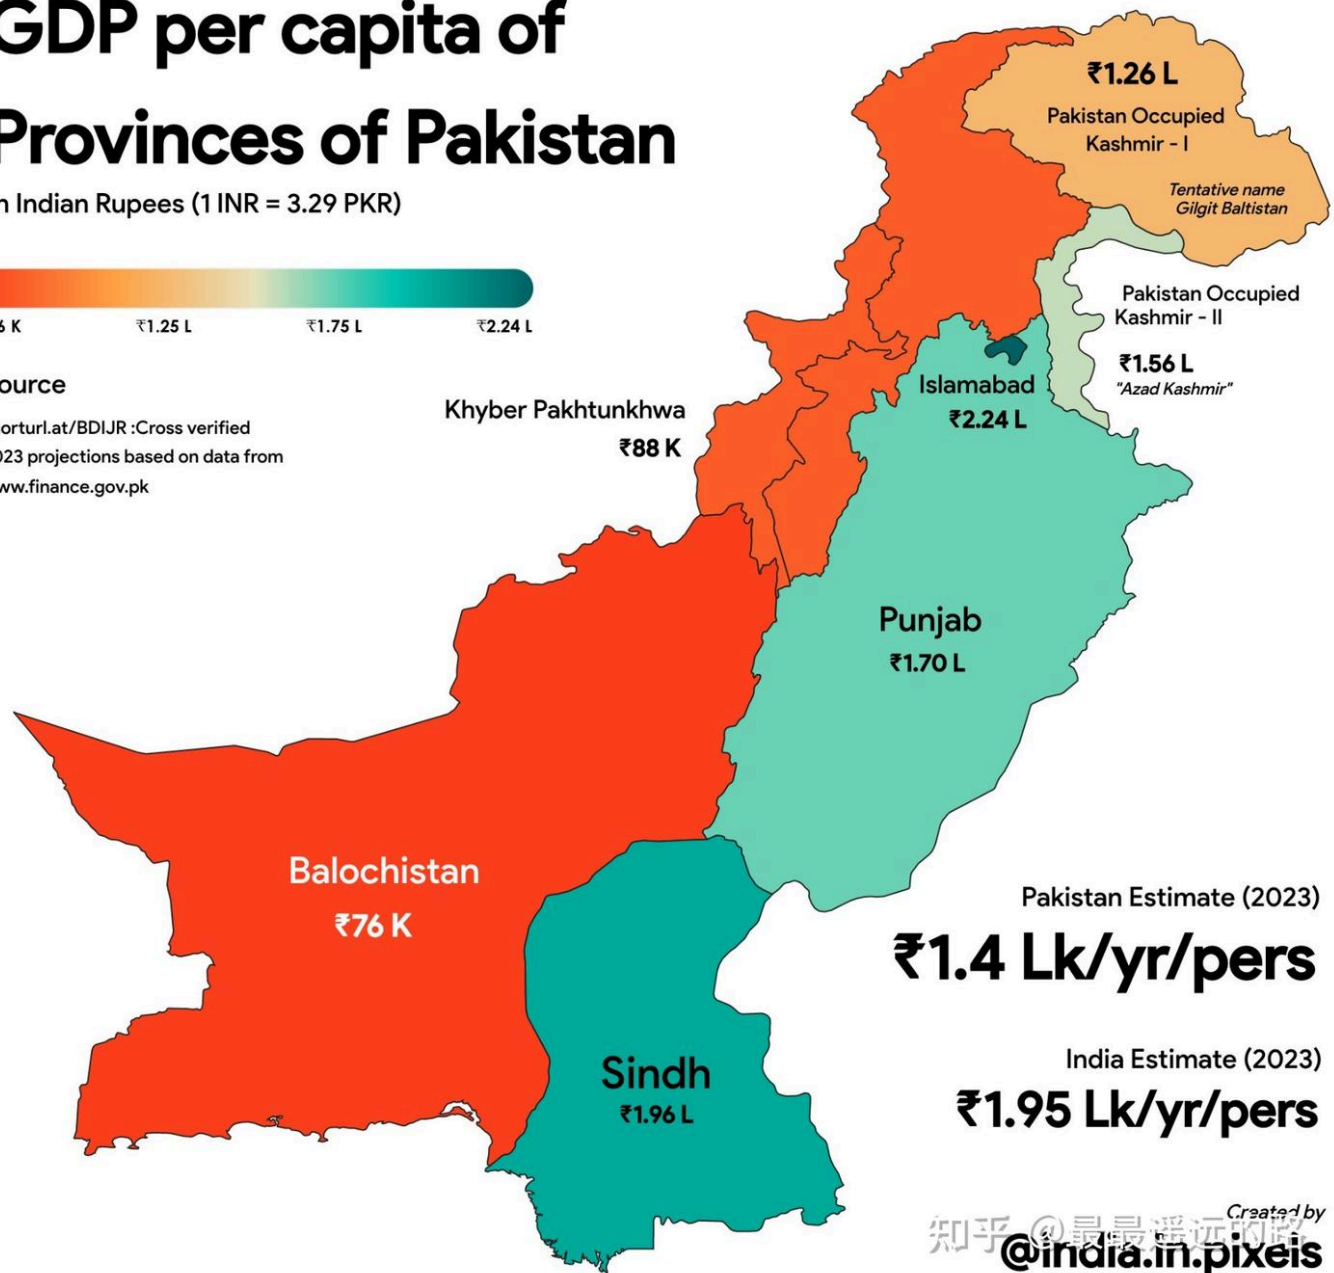

# GDP per capita of Provinces of Pakistan

In Indian Rupees (1 INR = 3.29 PKR)

## Source

shorturl.at/BDIJR :Cross verified  
2023 projections based on data from  
www.finance.gov.pk

Matatizo ya usalama yanaathiri uwekezaji wa viwanda, lakini sio jambo kuu la kuzingatia (India pia ina matatizo ya usalama); kwa kuwa viwanda vinajilimbikizia katika maeneo ya viwanda, nafasi ya mashambulio ni ndogo kuliko miradi ya miundombinu. Matatizo haya yanaweza kutatuliwa kwa msingi tu baada ya uhamishaji mkubwa wa viwanda kuanza, wakati vijana wa ndani wataweza kwenda mijini kufanya kazi.

## Muhtasari

Pakistan iko katika kipindi muhimu cha miundombinu na viwanda vya msingi; kwa mwendo wa sasa, kabla ya 2040 itajenga mtandao wa kisasa wa barabara na reli; uwezo wa chuma na usafishaji utatosheleza mahitaji ya msingi ya viwanda vikubwa; viashiria vya kila mtu vitafikia kiwango cha China 1990–2000; hali za kupokea viwanda vya kati na vya chini vya Asia ya Kusini–Mashariki zitapatikana. Ikilinganishwa na Afrika Mashariki, Pakistan ina faida za wazi katika eneo, msingi wa viwanda na miundombinu. Kijiografia na kisiasa, China pia inataka makampuni ya kimataifa ya China kupelekwa Pakistan.

Zaidi ya hayo, Pakistan imeunda au itaunda uhusiano wa muungano na Saudi Arabia na Uturuki. Uchumi wa Uturuki na Saudi Arabia ni wa maendeleo zaidi kuliko Pakistan; sehemu kubwa ya mtaji wao wa ziada utaenda Pakistan. Kwa hiyo uwezekano wa mgogoro wa fedha za kigeni wa Pakistan ni mdogo kuliko Afrika Mashariki.

Kwa hiyo, kwa ujumla, wakati wimbi lijalo la uhamishaji litakapofika katika miaka ya 2040, Pakistan itaweza kuchukua sehemu ya viwanda kutoka India, na wakati huo huo iko mbele ya Afrika Mashariki kwa hatua moja — ina uwezo kamili wa kupokea fursa hii. Kuanzia 2040 hadi 2060, Pakistan katika wimbi la mtaji wa kigeni itakamilisha ukuaji wa miji, viwanda, na kukuza makampuni makubwa ya ndani.
