

Ni kampuni gani ya China iliyouza India mashine ya kuchimba handaki (TBM)?

Zhihu

Kwanza, kama wanaotumia wengine walivyojibu (Ni kampuni gani ya China iliyouza India mashine ya kuchimba handaki?), India pia ina viwanda vya TBM vilivyofunguliwa na makampuni ya kimataifa, na inaweza kutengeneza TBM ndani. Hivi karibuni mashine hii ilitumika katika ujenzi wa metro ya Mumbai^[1]. Mashine za kuchimba handaki za China ni nafuu, lakini haziundi kizuizi chochote cha teknolojia. Kulazimisha makampuni ya China kutouza kunamaanisha kuachia soko kwa makampuni mengine kwa hiari. Katika mkakati mkuu wa mzunguko wa pande mbili, kuingilia uuzaji wa bidhaa zisizo na hatari yoyote ya uvujaji wa teknolojia ya hali ya juu ni jambo la kushangaza sana.

Pili, BEML ya India inatengeneza TBM ya kwanza ya ndani. Kipenyo mita 6.5, kwa metro. Mradi bado katika hatua ya kubuni; tarehe haijulikani. Delhi Metro Rail Corporation imesaini mkataba wa kukumbukwa na BEML kwa ununuzi, kuhakikisha mnunuzi. BEML na DMRC ni makampuni ya serikali; inaonekana India inajiandaa kurudia mfano wa China — kuhamasisha taifa lote kutengeneza chombo kama hiki cha nguvu ya taifa.

Mbali na TBM, makampuni ya India yamepata maendeleo makubwa katika vifaa vizito kama vidhibiti vya majimaji (excavators). 2021, BEML ilitoa excavator ya majimaji ya daraja la tani 180^[2]. Excavator ya majimaji ya daraja la tani 200 wa kiwango hiki, makampuni ya China yalikamilisha utafiti na maendeleo yake mwaka 2008^[3]. Hivi sasa excavator kubwa zaidi ya majimaji ya China ni ya tani 700, na excavator kubwa zaidi ya majimaji duniani ni ya daraja la tani 980, iliyotengenezwa na Caterpillar.

Bulldozer kubwa zaidi ya BEML ni daraja la tani 100^[4], iliyotolewa mwaka 2024^[5]. Bulldozer za China za daraja sawa zilitolewa karibu mwaka 2012.

Kwa hiyo, kudharau kasi ya maendeleo ya viwanda vya kati vya India sio sahihi.
